

FOR IMMEDIATE RELEASE

WyreStorm Releases a Pure HDMI Matrix Switcher – the MX-0808-H2A-MK2

ALBANY, NY – 1ST April 2021 – WyreStorm, a leading innovator in AV distribution and control over IP, HDBaseT, and HDMI is proud to extend its Matrix Switcher line with MX-0808-H2A-MK2.

The MX-0808-H2A-MK2 is a welcome refresh to the powerful line of H2A pure HDMI switchers. The MK2 is familiar on the surface but has a host of improvements and added features. To start, the HDMI outputs now feature 4K > 1080p downscalers promoting easier integration of mixed resolution displays into a single system. The HDMI outputs also support Audio Return Channel from smart TVs to bring audio from apps like Netflix, Prime Video, Hulu, and more to an external audio system. Speaking of audio, the analog audio outputs have been updated to balanced connections to ensure there is no loss in fidelity or interference.

As a standard requirement with the latest WyreStorm products, the MK2 supports the latest video formats including 4K HDR and Dolby Vision content all in uncompressed HDMI glory. All 8 HDMI outputs support ARC from Smart TVs which can then be sent back to the matrix and de-embedded through any of the digital S/PDIF outputs to an AVR or DSP. The MX-0808-H2A-MK2 is ideally suited for Residential, Retail and Education installations.

Contact your local authorized WyreStorm distribution partner or visit wyrestorm.com for further details on this or any of the other WyreStorm 4K & HD Distribution and Control Solutions utilizing AV over IP, HDBaseT, and HDMI.

About WyreStorm
