Digital Signage - Pro Series

A wide range of configurations

The Pro Series is a versatile digital signage system that can be configured as ceiling mounts, floor-to-ceiling mounts, menu boards, or wall mounts.

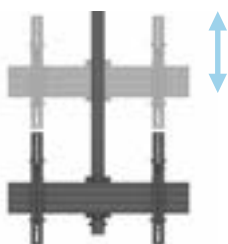

Thanks to its modular design, installers have the freedom to adapt, update, or completely reconfigure the setup as requirements evolve.

Over time, a single installation can be expanded or combined into an almost unlimited range of new configurations, ensuring maximum flexibility and long-term value.

Precision leveling

Each mounting bracket includes micro-adjustment features, allowing precise height adjustments to ensure screens are perfectly level and aligned.

Extendable Height

The extendable poles allow the screen mounting plate to be positioned at virtually any height. For tighter spaces, a single-pole setup can achieve a minimum distance of just 80 cm.

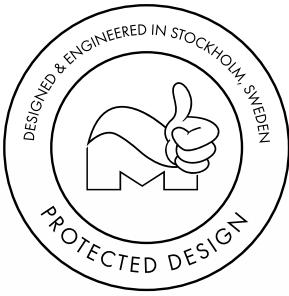

Easy Tilt

The mounting brackets can be tilted forward by 5°, 10°, or 15° to optimize viewing angles while keeping screens perfectly aligned. To counteract potential forward lean, they can also be adjusted up to 6° backward.

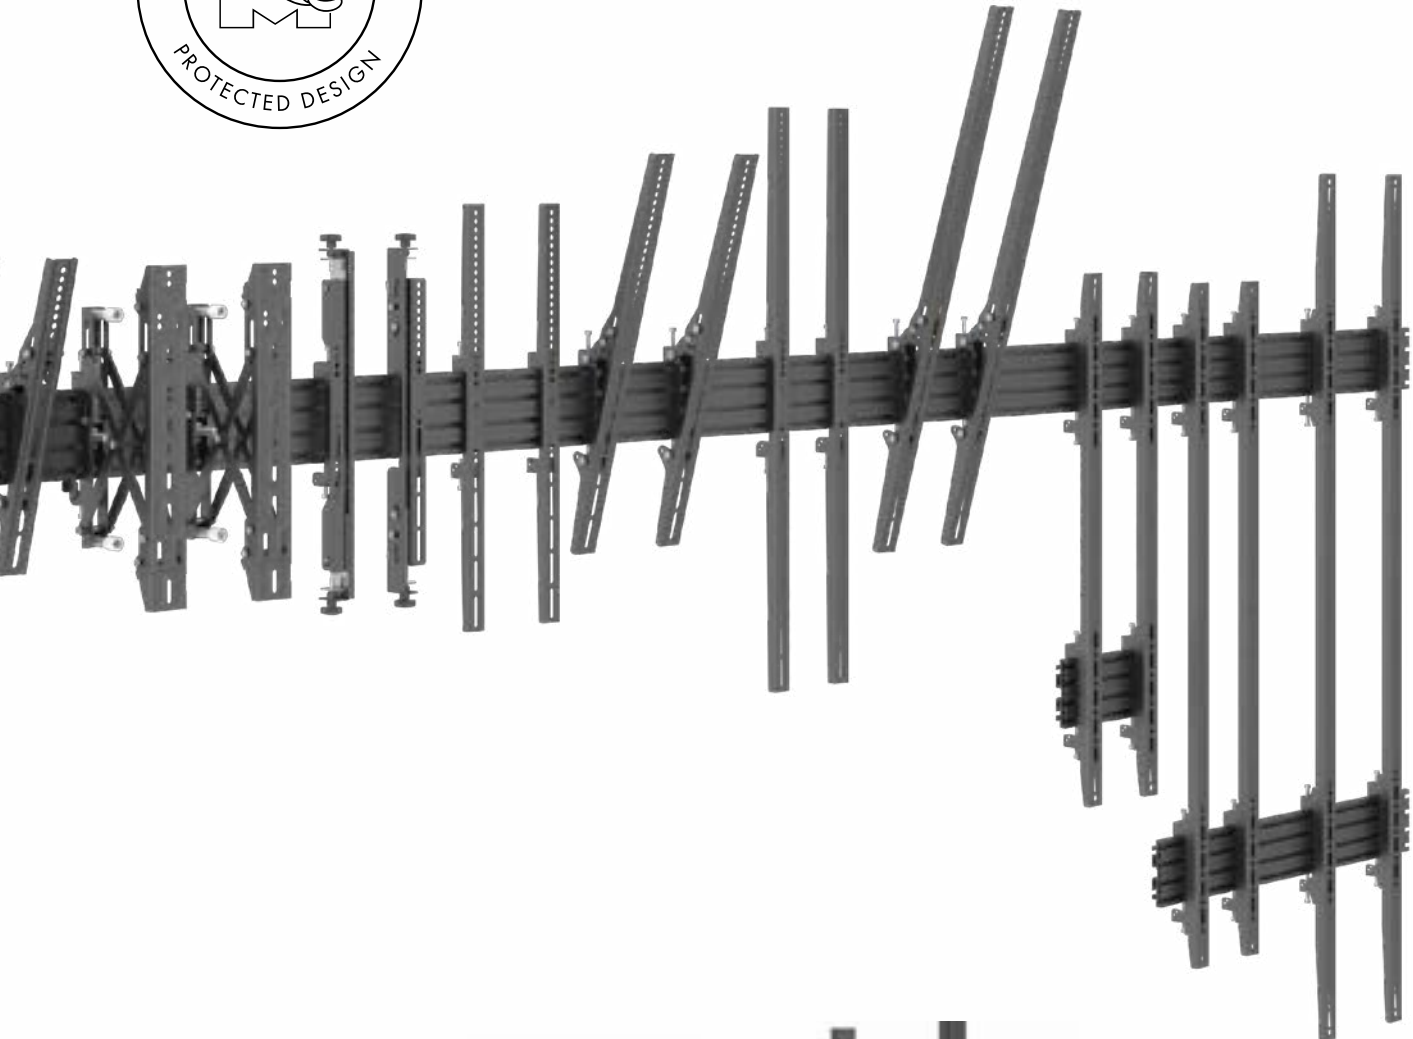

Modular Design

Available in a wide range of models, our digital signage ceiling mounts support from a single display up to 18 screens, each weighing up to 30 kg. The modular construction allows additional extrusions to be added for wider VESA patterns or for connecting multiple units together, ensuring maximum flexibility for any installation.

Selected models are
TUV approved

Cable Management

The extension pole's hollow core offers a clear path for routing cables, while an opening in the mounting plate lets them pass directly into the ceiling, ensuring a clean, professional installation.

Easy Installation

To minimize strain during setup, the ceiling plates are lightweight and installed separately from the rest of the mounting system. Once in place, simply slide in each extension pole and secure it, making installation fast, safe, and hassle-free.

Flexible floor mounting

The Pro Series is designed to support a wide range of freestanding solutions, wheeled, floor-standing, or securely bolted to the floor. Perfect for heavy-duty multi-screen installations, it combines robust functionality with a premium finish for an attractive, professional appearance.

Displays or LED panels

The Multibrackets Pro Series is a universal mounting system, compatible with LED panels, compatible with LED panels, and displays from leading brands like Samsung, LG, and Philips. Configurable in ceiling, wall, wheeled, freestanding, or floor-bolted formats, it's one of the market's most versatile solutions.

M Pro Series Rail System

Function and freedom for the installer

The Pro Series horizontal mounting rails form the backbone of every Pro Series solution — whether used in a wall-mounted menu board or a single-screen ceiling mount.

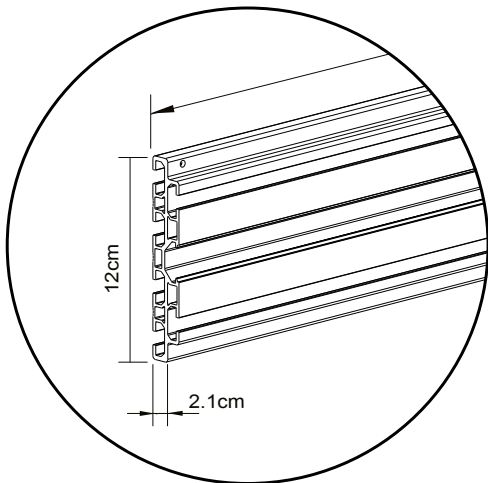

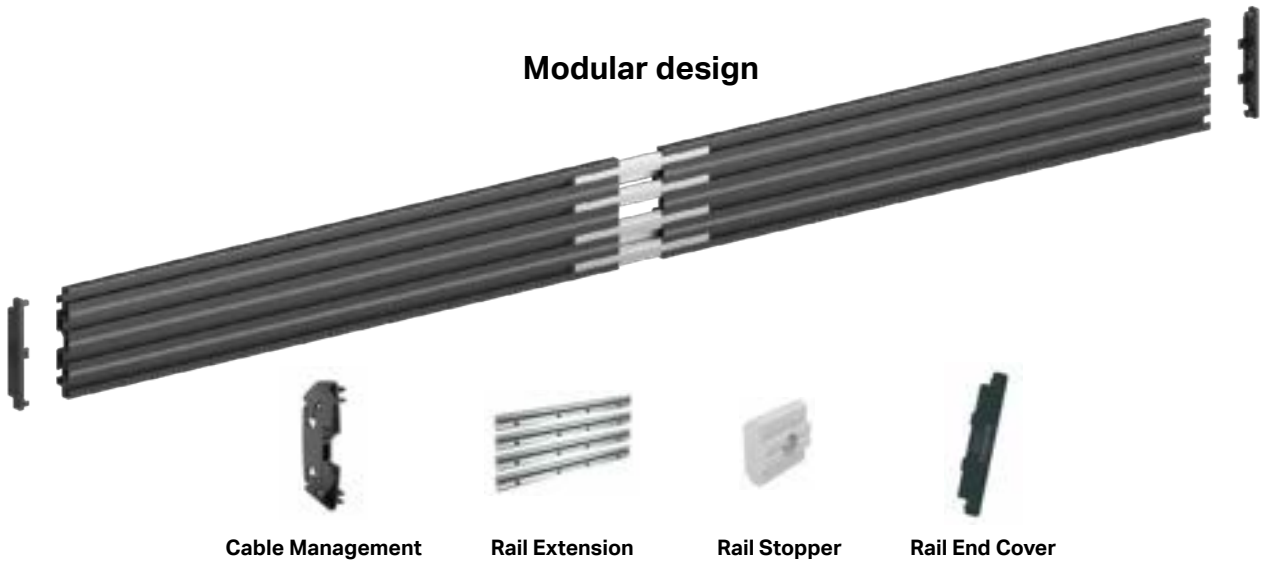

Crafted from high-grade aluminum, the rails are both strong and lightweight. They

are designed to support a wide range of interface arms and mounts, making it easy to attach monitors, displays, and other AV equipment.

Available in packaged lengths of 28 cm, 48 cm, 68 cm, 100 cm, 196 cm, and 348 cm, the rails can be mounted on Pro

Series columns, poles, or wall brackets. For maximum flexibility, they can also be cut to shorter lengths or extended by joining multiple sections together with extension kits, ensuring a perfect fit for any installation.

Let us and our partners assist you with

The crises of recent years have transformed consumer behavior. To stay relevant, retailers must adapt fast and meet rising expectations with engaging, future-proof experiences.

Multibrackets – Complete Indoor & Outdoor Mounting Solutions

The growth of large LED displays gives retailers new ways to redefine their marketplace. By uniting online and in-store messaging, they can create closer customer connections and deliver a true Retail Experience 2.0.

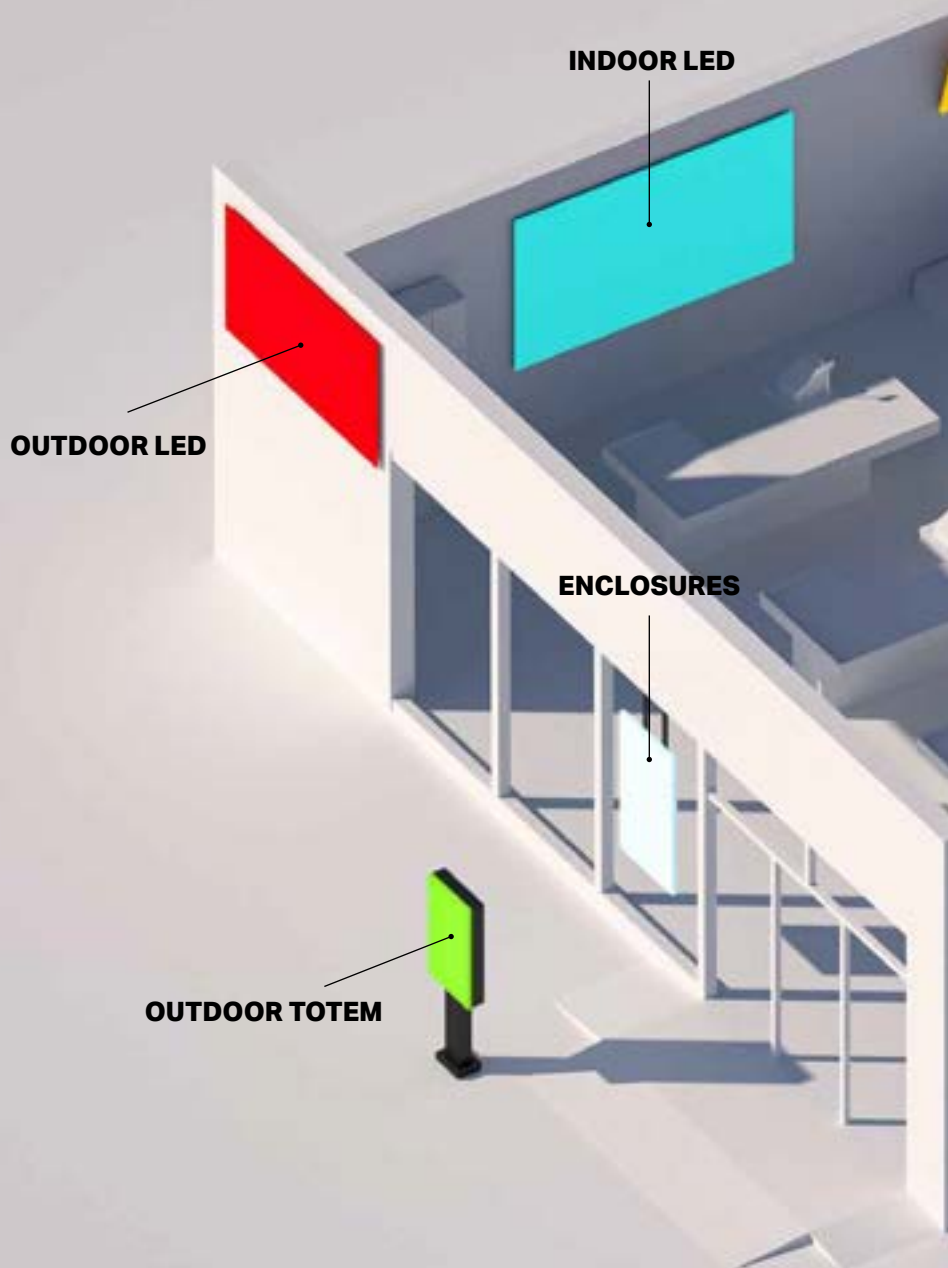

Multibrackets supplies all the indoor and outdoor mounting equipment needed for any project. Our team helps you design standout installations that attract attention and drive engagement in today's competitive retail landscape.

Digital signage with modular LED panels enables flexible, high-resolution displays of any shape or size, merging digital and physical experiences like never before.

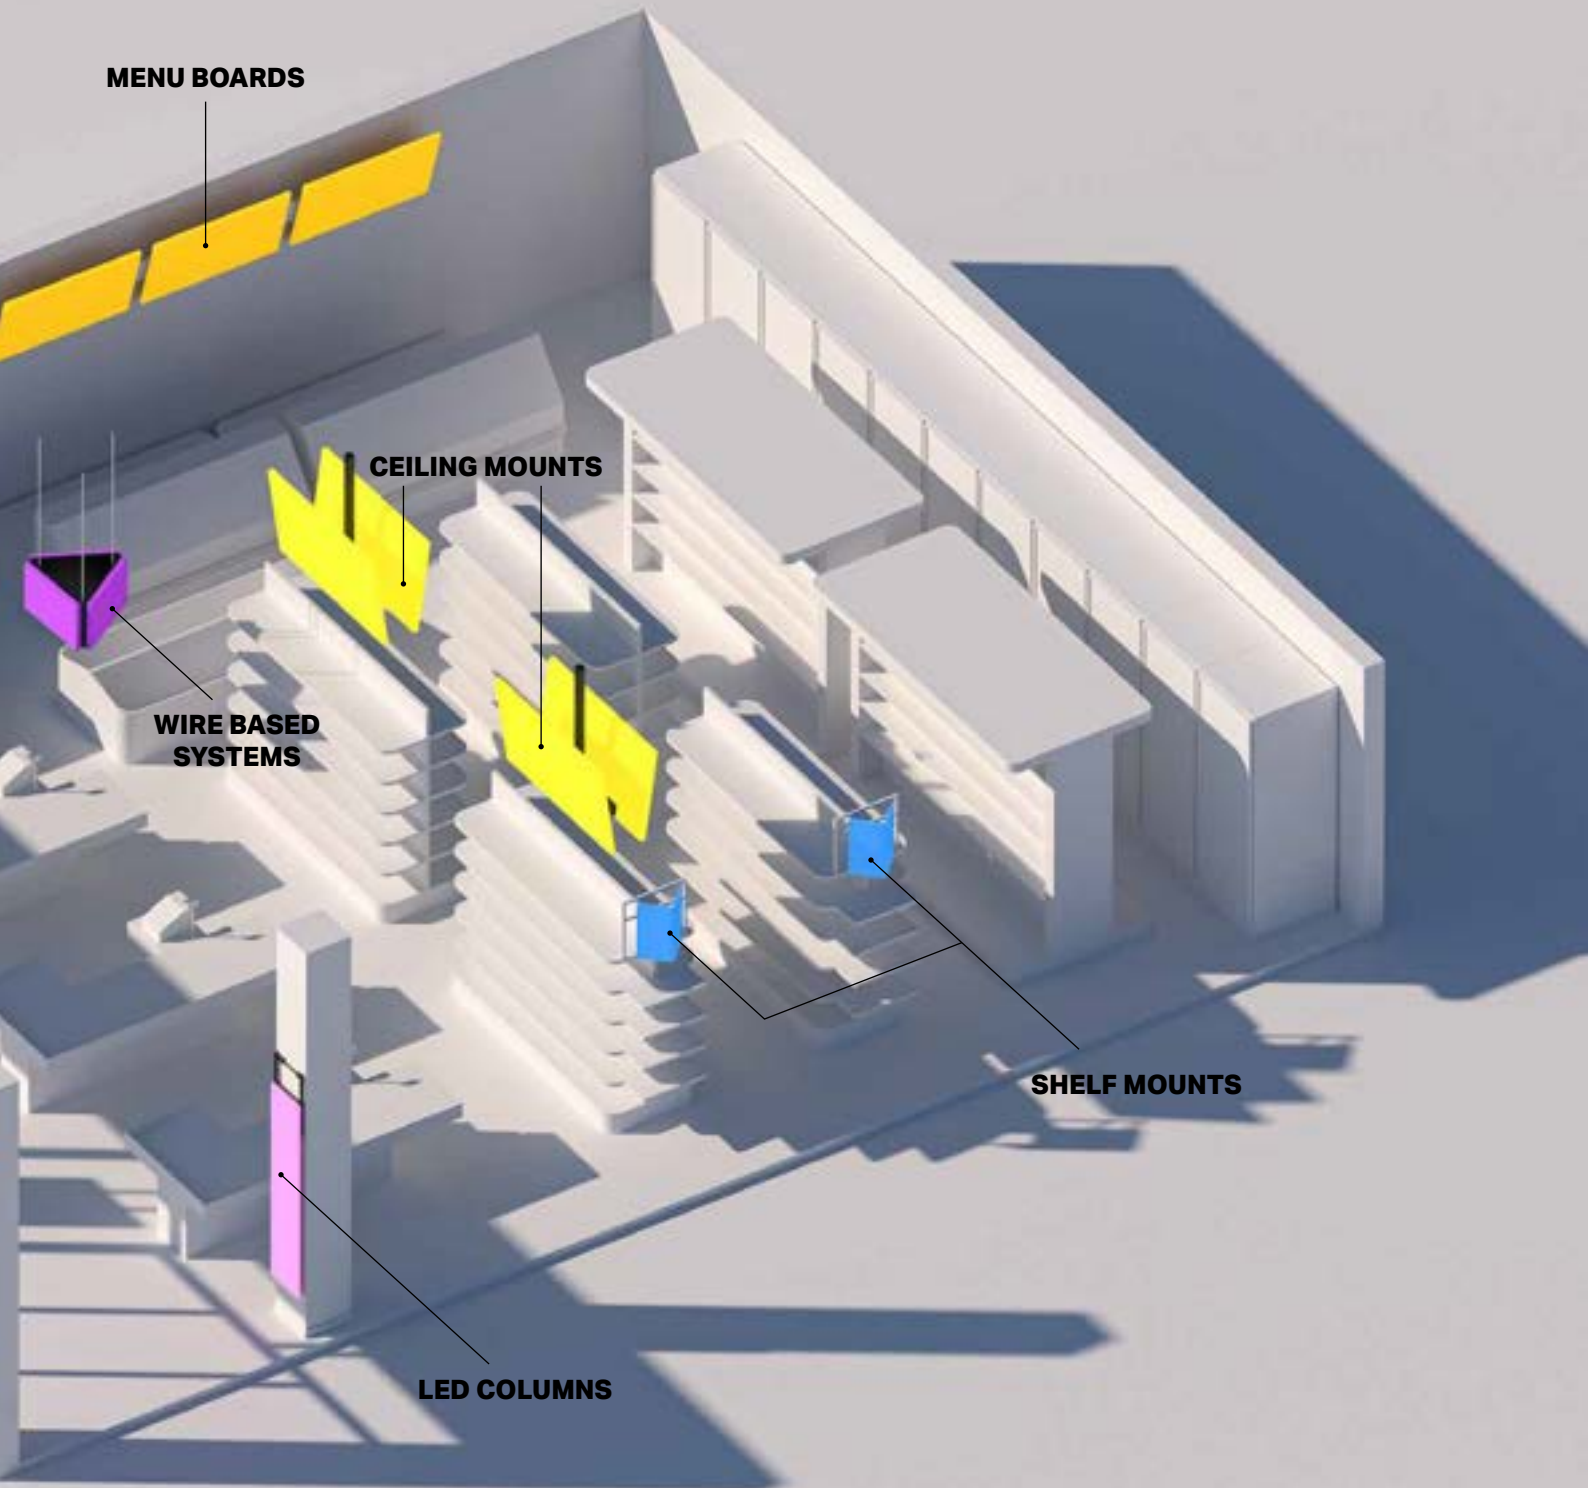

Project Start, tailored to You

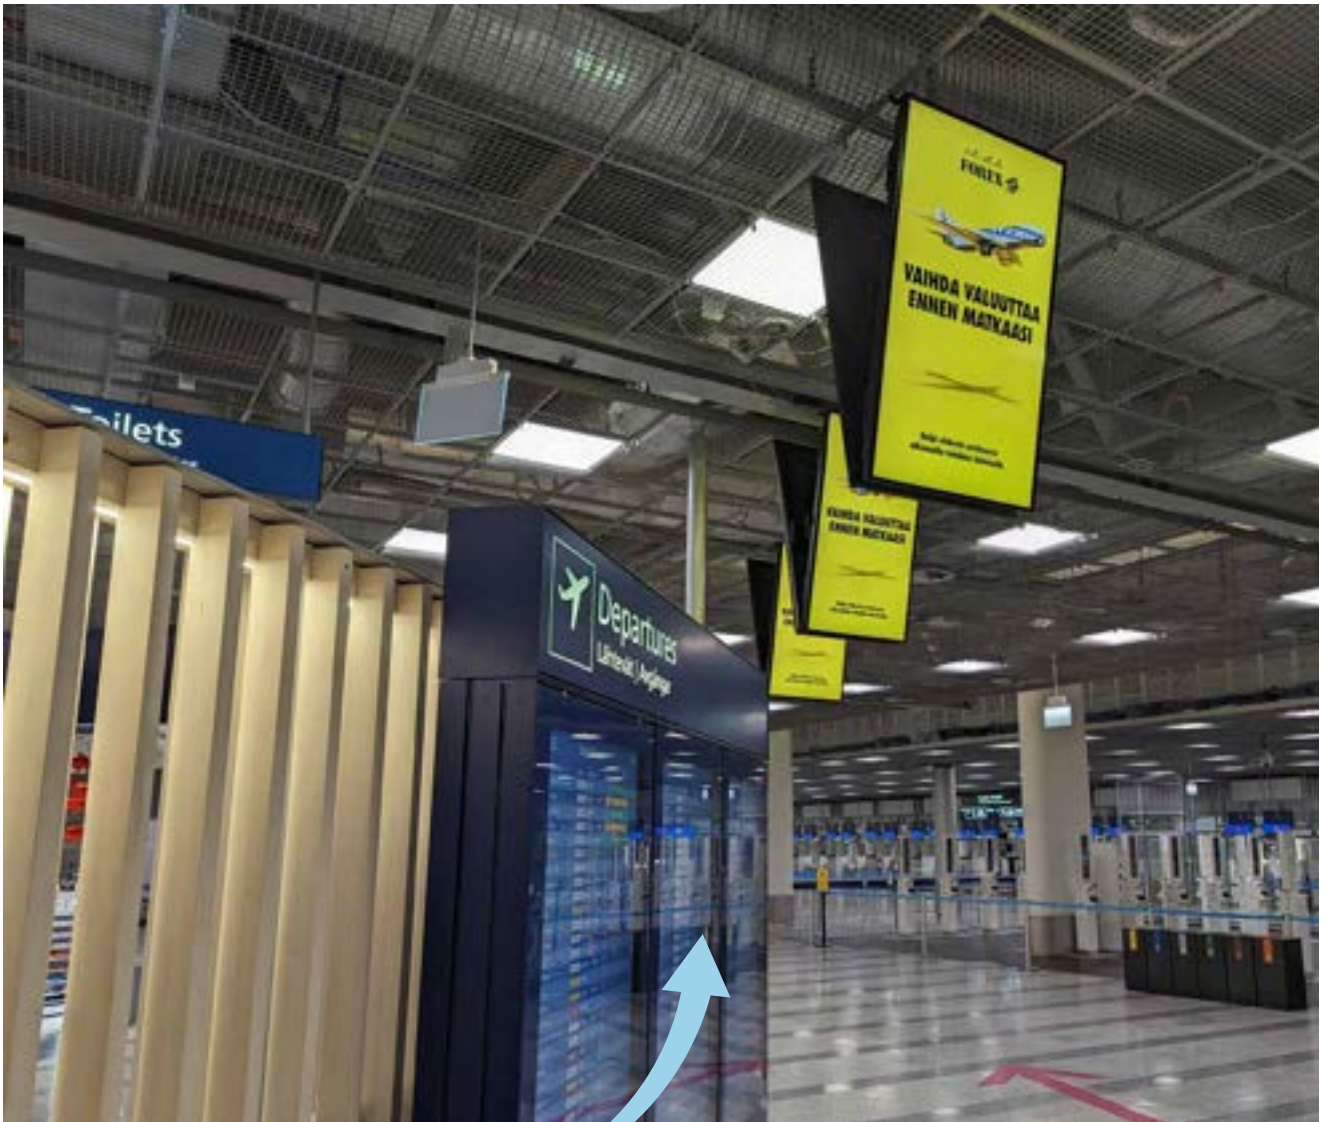

Partnering with leading LED suppliers, Multibrackets provides the mounting solutions that bring every concept to life, from ceiling and wall displays to window installations.

Multibrackets Tailormade: customized, high-impact digital signage for any project, large or small.

for your Digital Signage projects

Pro Series

Ceiling Mounted Solutions

Ideal for installers and digital signage projects, our ceiling-mounted systems make it possible to create single displays, dual setups, or full video walls in prominent locations where wall space isn't available.

Available in a variety of configurations, these ceiling mounts support commercial displays from 32" to 100".

Designed with space efficiency and ease of installation in mind, they provide a clean, reliable, and professional solution for virtually any commercial environment.

Ceiling Mounted Triple & Quad Solutions

Volvo showroom

Maximize visibility from every angle with our ceiling-mounted triple and quad display solutions. Designed for high-traffic environments such as airports, shopping centers, and showrooms, these systems allow multiple displays to be mounted back-to-back or around a central pole, ensuring content is visible in all directions.

With modular design, integrated cable management, and precise tilt adjustments, these solutions combine professional functionality with a clean, minimal aesthetic. Perfect for creating powerful digital signage that reaches your audience from every side.

Perfect in locations where 360° visibility is important.

Pro Series tested for 5 times the max load

Selected models are TUV approved

Large Screen Ceiling Mounts

The Dual Pole range of Pro Series ceiling mounts is designed to support one or two large displays, mounted back-to-back in either landscape or portrait orientation.

Combining easy installation with a clean, modern design, the Dual Pole system is both robust and highly functional, ideal for a wide variety of environments such as retail stores, classrooms, training rooms, lobbies, auditoriums, or exhibition halls.

As with all Pro Series solutions, a complete line of accessories is available, allowing you to tailor functionality to meet specific requirements. Integrated cable management keeps AV wiring hidden, ensuring a neat and professional appearance.

What is Gravity Center?

A robust and innovative ceiling pole designed to securely hang displays by aligning with their natural center of gravity.

This unique design ensures straighter and more stable installations, especially for larger or heavier displays.

By angling the column to match the display's center of gravity with the mounting point, it reduces stress on the coupler joint, preventing unwanted movement or disruption of the column.

CCTV / Camera Ceiling Mounts

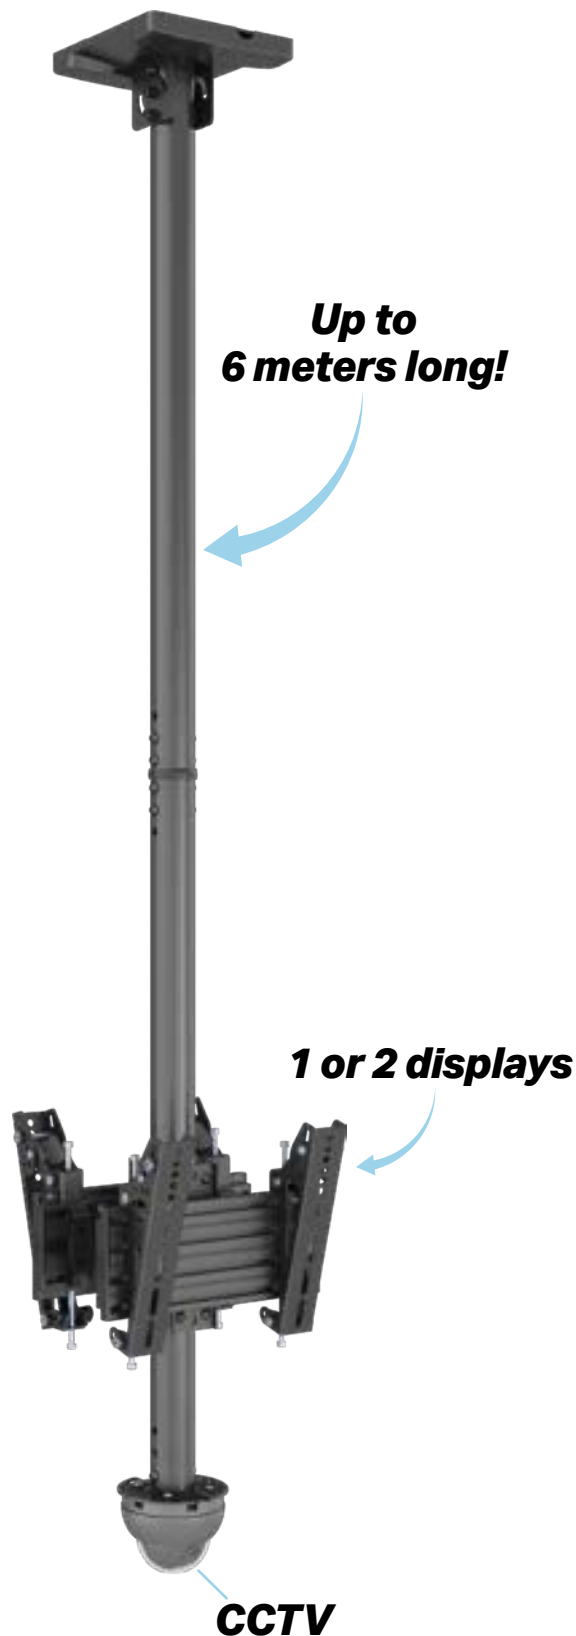

Affordable and flexible ceiling installations

The Pro Series CCTV camera mounts are designed for retail and commercial environments where fixed dome or fixed box cameras need to be positioned under high ceilings. Featuring telescopic functionality, the extension length can be easily adjusted from 1 m to 6 m for secure and precise placement.

Compatible with the Pro Series rail system and accessories, these lightweight yet robust mounts offer maximum flexibility. Each ceiling mount can also be rotated 90° for horizontal wall mounting, making them a perfect choice for sloping ceilings or on-wall installations.

Highlights:

- Works with most CCTV and dome cameras solutions
- Suitable for indoor use
- Perfect for retail and commercial environment
- Extendable between 1.5 to 6 meters
- Lightweight and robust
- Available in black or white colors

Pro Series Wallmounts

From Wall / Wall to Wall

When displays need to be mounted perpendicular to a wall, the M Pro Series From Wall and Wall to Wall models provide the perfect solution. Designed for open areas such as hallways, concourses, aisles, and office spaces, these mounts ensure maximum visibility where clear

communication is essential. The brackets mount vertically, allowing displays to be positioned perpendicular to a single wall or between two walls. Available as single or double-sided solutions, they are ideal for wayfinding, directional signage, or high-visibility digital information in

high-traffic environments. With a clean Scandinavian design, durable construction, and simple installation process (including all necessary hardware) the M Pro Series From Wall / Wall to Wall offers both practicality and aesthetics in one solution.

Ceiling-Mounted Menu Board Mounts

- Universal design suitable for all sized screens up to 100"
- High-end aesthetics
- Designed to handle landscape or portrait mounting
- Brackets fixed, tilt or micro adjustable
- Support a wide range of VESA 75/100/200/300/400/600/900
- Built in levelling screws to adjust the screen height
- Built in cable management
- Add or change displays after time, Pro Series follows
- Selected models are TUV certified

Flexible menu boards. Starting at 1U builds up to 10U's side by side, landscape or portrait.

Our Menuboard

The Pro Series menu boards are designed for installers and digital signage projects, available in both ceiling-mounted and wall-mounted configurations.

Ceiling-mounted solutions make it possible to build single displays, dual setups, or full video walls in locations where

wall space isn't available. Supporting commercial displays from 32" to 100", they come in a variety of arrangements to suit any installation.

With their space-saving design, menu boards are ideal for public environments such as restaurants, receptions,

and retail spaces. Screens can be mounted in landscape or portrait orientation, with tilt adjustment for improved overhead visibility.

As part of the modular Pro Series, menu boards can be combined with other products in the range to create virtually unlimited configurations.

High-end aesthetics, flexible options for fixed, tilted, or micro-adjustable brackets, and levelling screws for precise alignment make achieving a perfect screen-to-screen fit simple.

Menuboard with Gravity Center

A robust and innovative ceiling pole designed to securely hang displays by aligning with their natural center of gravity.

This unique design ensures straighter and more stable installations, especially for larger or heavier displays.

By angling the column to match the display's center of gravity with the mounting point, it reduces stress on the coupler joint, preventing unwanted movement or disruption of the column.

Model: Extension Pipe 0.915m Gravity Center

Maintains perfect alignment over time

Works with 32" - 75"

Wall-mounted Menu boards

The Multibrackets Pro Series wall-mounted menu board system is designed to create a seamless mounting surface by connecting multiple displays side by side on the M Pro Series rail. A single horizontal aluminum rail extrusion with depth adjustment ensures

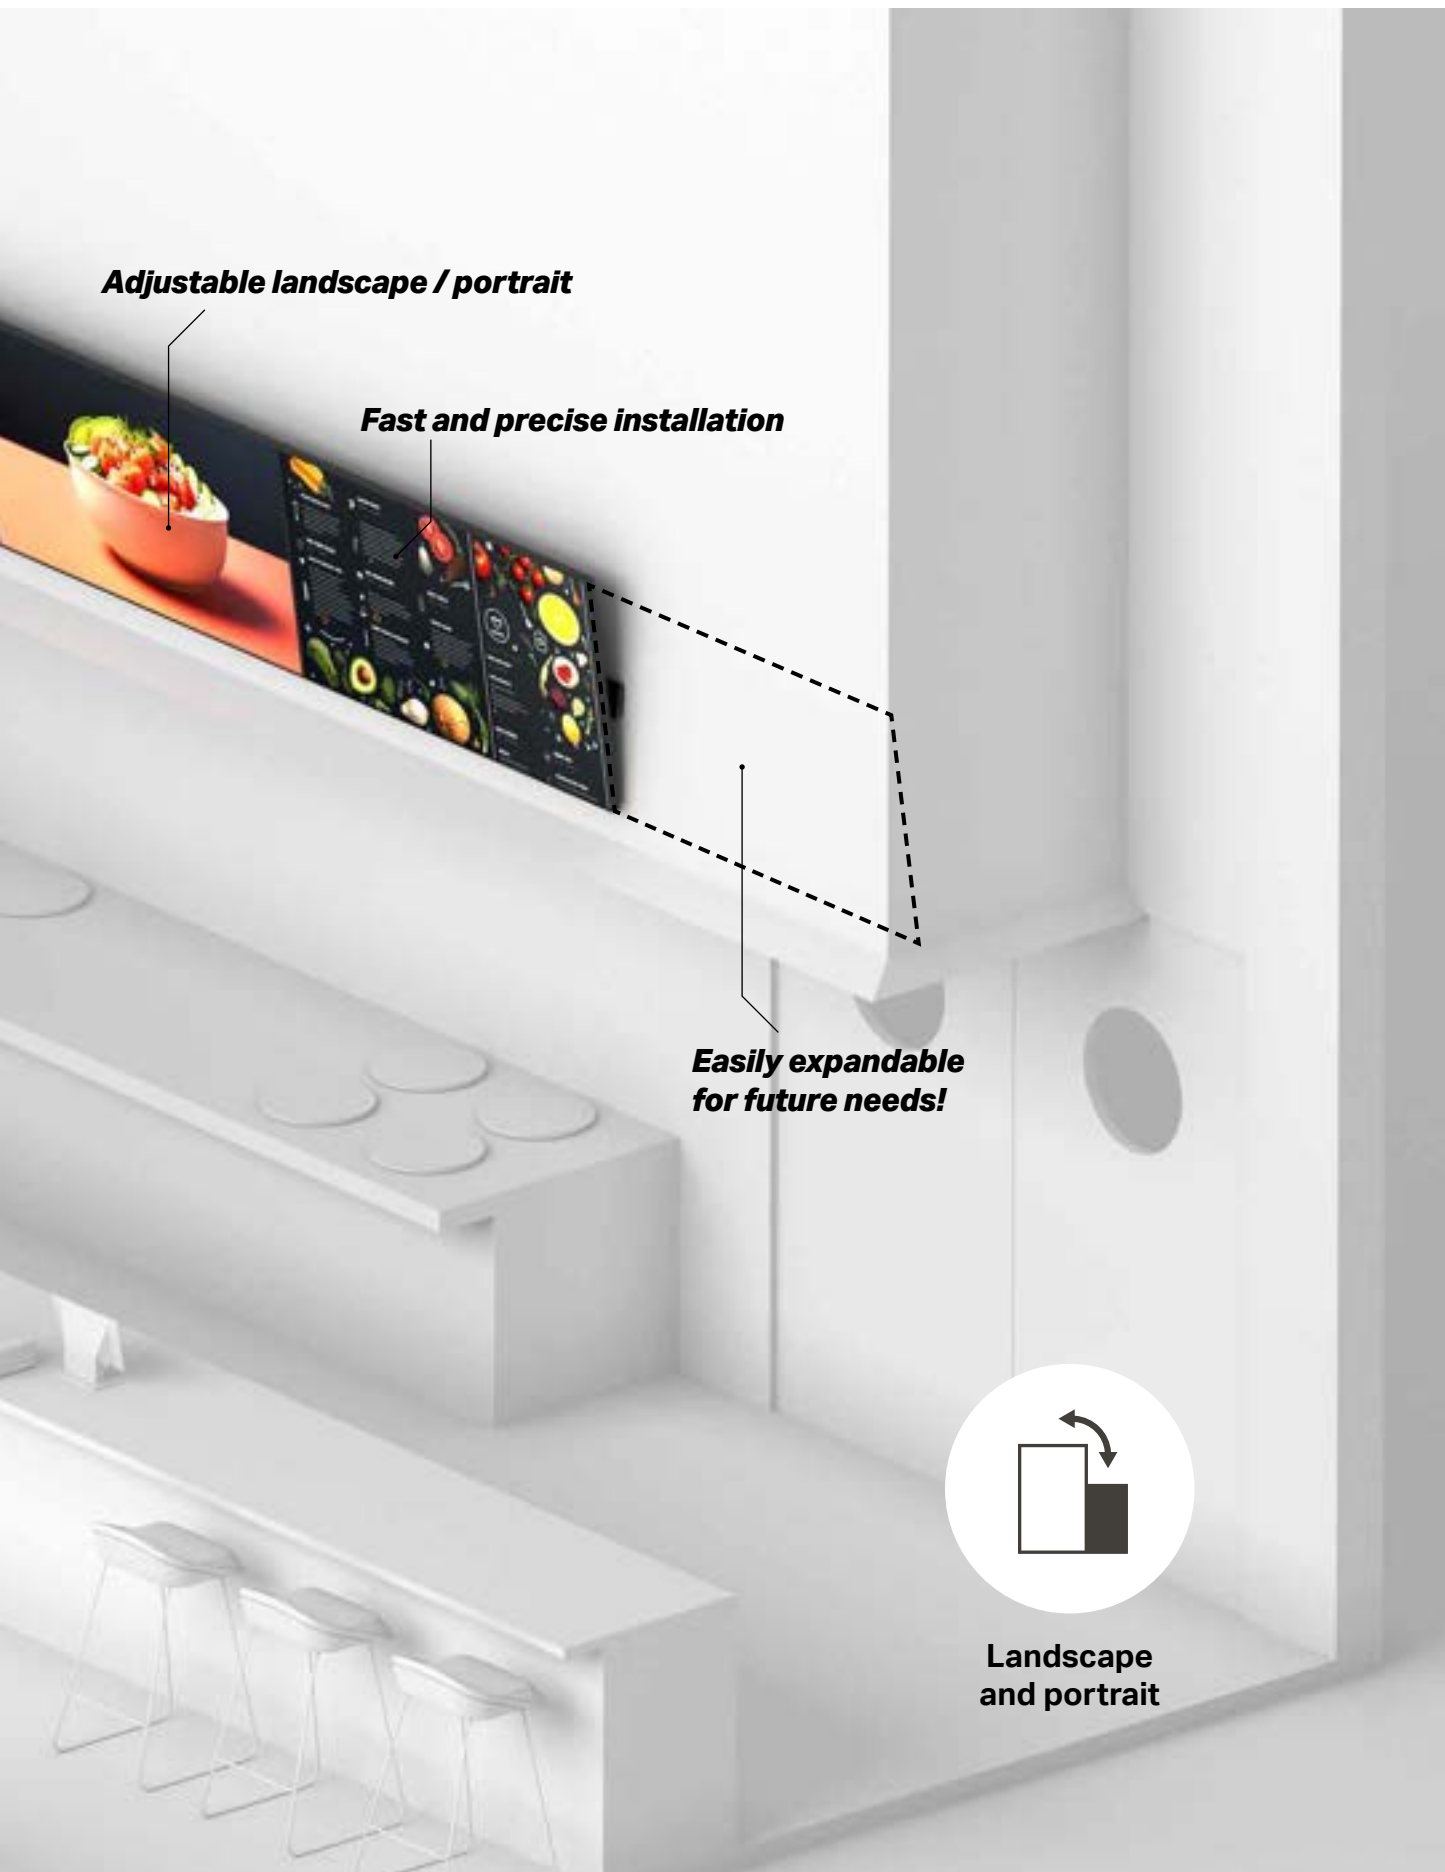

quick alignment, even on uneven wall surfaces, while still allowing easy access behind the displays for servicing.

Available with fixed, tilt, or fine-tune bracket options (supporting VESA 50 to VESA

900), the system makes it simple to tilt and align multiple displays at the exact same angle for a flawless, professional finish.

Tool-less height and depth adjustments help compensate for wall imperfections, while

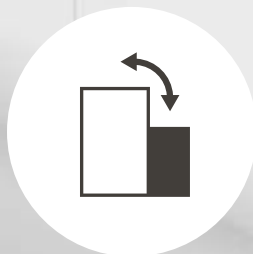

built-in cable management reduces both installation time and cost. Pro Series Menu Boards are available in landscape or portrait orientation, with standard options supporting 27"–65" displays, as well as custom solutions for larger screens.

Adjustable landscape / portrait

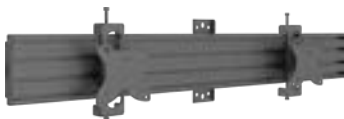

Fast and precise installation

**Easily expandable
for future needs!**

Floor-to-Ceiling Mount Solutions

Our floor-to-ceiling systems make it possible to install menu boards in prominent locations where traditional walls aren't available. They also provide an elegant solution in spaces where ceilings or walls cannot support the weight of a display.

As in-store digital signage continues to grow as one of the fastest expanding sectors

of the POS market, these mounts deliver both stability and style. With their modern design and clean, eye-catching appearance, floor-to-ceiling solutions not only provide flexibility but also serve as an immediate focal point in any environment.

Pro Series Floor-to-Wall Mounts

The M Floor to Wall Mount provides a rock-steady display solution designed for retail stores, shopping malls, and other public spaces. Using 50 mm tubes in black, brass, or chrome, the system can be tailored to seamlessly fit its surroundings.

Screens can be mounted in either fixed or tilt positions, and multiple displays can be placed side by side or stacked vertically to create the perfect setup for any environment.

Pro Series

Wall-Mounted Solutions

Our Pro Series wall mounts are ideal for menu boards or digital signage installations, offering precise display positioning and flexible adjustment options.

The single horizontal extrusion, with optional push-in/pop-out and depth adjustment, ensures

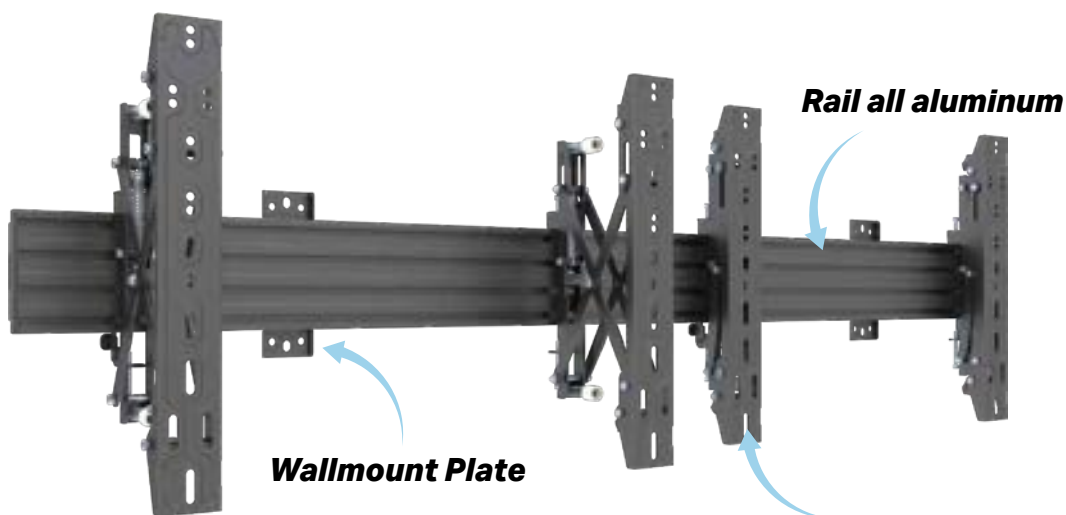

fast alignment even on uneven wall surfaces. It also provides easy access behind the displays for quick and efficient servicing. For multi-screen installations, the Pro Series wall mounts provide a simple and reliable way to achieve perfect display positioning. Installers

can choose from a range of standardized bracket and adjustment solutions to suit their needs.

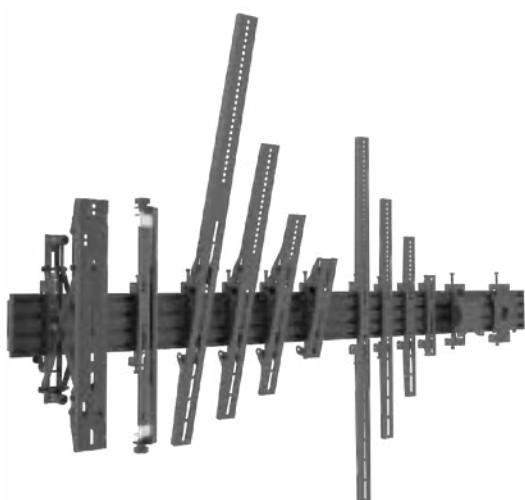

Using a single aluminum extrusion rail with fixed, tilt, or push-in/pop-out brackets, screens can be aligned quickly

and efficiently, ensuring the best possible installation experience.

Maximize flexibility

Pro Series Wallmounts

The Multibrackets Pro Series Wallmount range is engineered for compact and reliable digital signage installations. Ideal for displaying dynamic content in retail, hospitality, transportation hubs, or corporate spaces, these mounts combine Scandinavian design with

professional performance. Built for efficiency and visual harmony, each model offers precise screen adjustment, integrated cable management, and quick installation, delivering a clean, modern presentation for any digital signage environment.

Wallmounts

For very large displays!

The Pro Series wall mounts are designed for menu boards and digital signage installations, offering precise display positioning and flexible adjustment options. A single horizontal extrusion

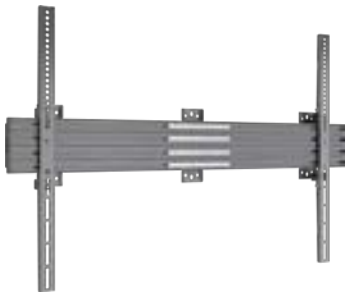

with optional push-in/pop-out and depth adjustment ensures fast alignment, even on irregular wall surfaces. It also provides convenient access behind the displays for easy servicing.

Micro Adjustable Wall Mounts

The M Wallmount Pro Micro Adjustable Black features built-in fine-tune adjustments, allowing each screen to be individually aligned with its neighboring displays.

Easy-to-reach adjustment knobs make it possible to precisely align depth, side, and height, tasks that once took hours can now be completed in minutes. Truly an installer's dream.

Designed with Scandinavian heritage in mind, every part and detail serves both purpose and aesthetics. The result is a sleek, Nordic solution that emphasizes quality, function, and a clean professional look.

Crafted from premium materials, this versatile ceiling mount is suitable for a wide range of environments, delivering both durability and style.

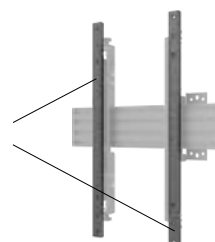

Easy Access for After Adjustments

Our micro-adjustable wall mounts provide quick and safe access to displays, ensuring precise handling down to the millimeter. This feature is essential when building video

walls or integrating single screens into wall structures, where easy servicing is a key requirement.

Add Media Storage to Pro Series Wall Mounts

The Multibrackets Pro Series offers a smart solution for integrating storage directly behind the display. The M Pro Series Media Storage Panel is a slide-out tray that allows AV equipment to be mounted discreetly while remaining easily accessible.

With this solution, service and adjustments can be carried out without removing the display - saving time while keeping installations clean and professional.

Push in pop out

Wallmounts / videowalls

The Push-In / Pop-Out feature is a mechanism built into certain display wall mounts that allows quick access to the front of the mounted screen without needing to fully uninstall or detach it. Essentially, it provides a simple push-to-release (pop-out), then push-back (push-

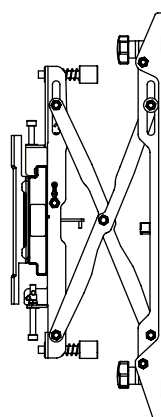

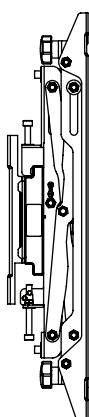

in) operation. This makes maintenance, cable access, or display changes far easier and faster.

Wallmounts with Floor support

The Floor Support system is designed for situations where a wall alone cannot safely carry the weight of a digital signage display. By combining a wall mount with a vertical support column, the load is transferred directly to the floor, ensuring stability even on weak or hollow walls. The

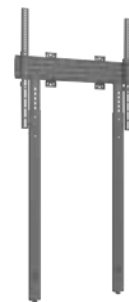

height-adjustable design allows precise positioning, while integrated cable management keeps installations clean and professional. This solution makes it possible to mount heavy or large screens in places where standard wall mounts are not an option.

Adjustable Wall Plate Box

A Smart Wall Bracket with Built-In Storage Space

The Pro Series Wall Plate Box is a versatile solution that functions as both a standard VESA mount and a wall bracket. It also serves as an all-in-one display bracket, allowing you to mount both the system and the display directly onto the wall — combining simplicity, functionality, and built-in storage in a single sleek solution.

Add a Codec or Accessory Behind Your Display

The M Pro Series Adjustable Wall Plate Box provides an elegant way to integrate codecs, players, or accessories directly behind the screen. Designed for dual-screen installations from 40" to 75", it offers both functionality and a clean, professional appearance.

Supports Multiple VESA Standards

Compatible with a wide range of VESA patterns - including 100x100, 100x200, 200x100, 200x200, and 400x200. The mount ensures broad compatibility with today's most common display requirements.

No measuring. No guessing. No errors.

Public Video Wall Mounts

Video walls should be simple to configure, fast to install, and easy to maintain. The Multibrackets range of full-service video wall mounts makes this possible.

Custom wall plate spacers take care of the precise measurements, so all you need to do is install the first mount - then use the spacers to perfectly position each additional mount. The result is a flawless video wall setup with minimal effort.

Public video wall

Mount Push HD 1200/1600 XL

The M Public Video Wall Mount Push HD 1200 XL supports VESA patterns from 300x600 to 1200x600 mm and loads up to 135 kg. This heavy-duty dual-rail pop-out mount suits 85"-120" displays from major brands like Samsung, LG, Philips, Sony, and NEC, ideal for recessed installs and easy maintenance.

Its smooth, soft-opening pop-out mechanism provides safe rear access, while tool-less micro-adjustments (± 10 mm in depth, height, and lateral) ensure perfect alignment. Integrated cable management keeps installations clean and professional.

Supporting both landscape and portrait modes, it fits a wide range of signage and interactive display applications. Installation is simplified with keyhole fixings and a hook-on design, with optional safety screws for added security.

Column & Column Dual

M Wallmount

An innovative solution for mounting single or dual displays directly onto columns, without the need for drilling. Designed specifically for indoor use, this system makes it easy and safe to mount digital signage displays on round columns, with support for both landscape and portrait orientation.

Perfect for stadiums, arenas, retail stores, and any environment where column-based mounting is preferred, it provides a secure and flexible way to attach displays to columns of various diameters.

Powerful flat band

Works with squared and round columns

Adjustable in size

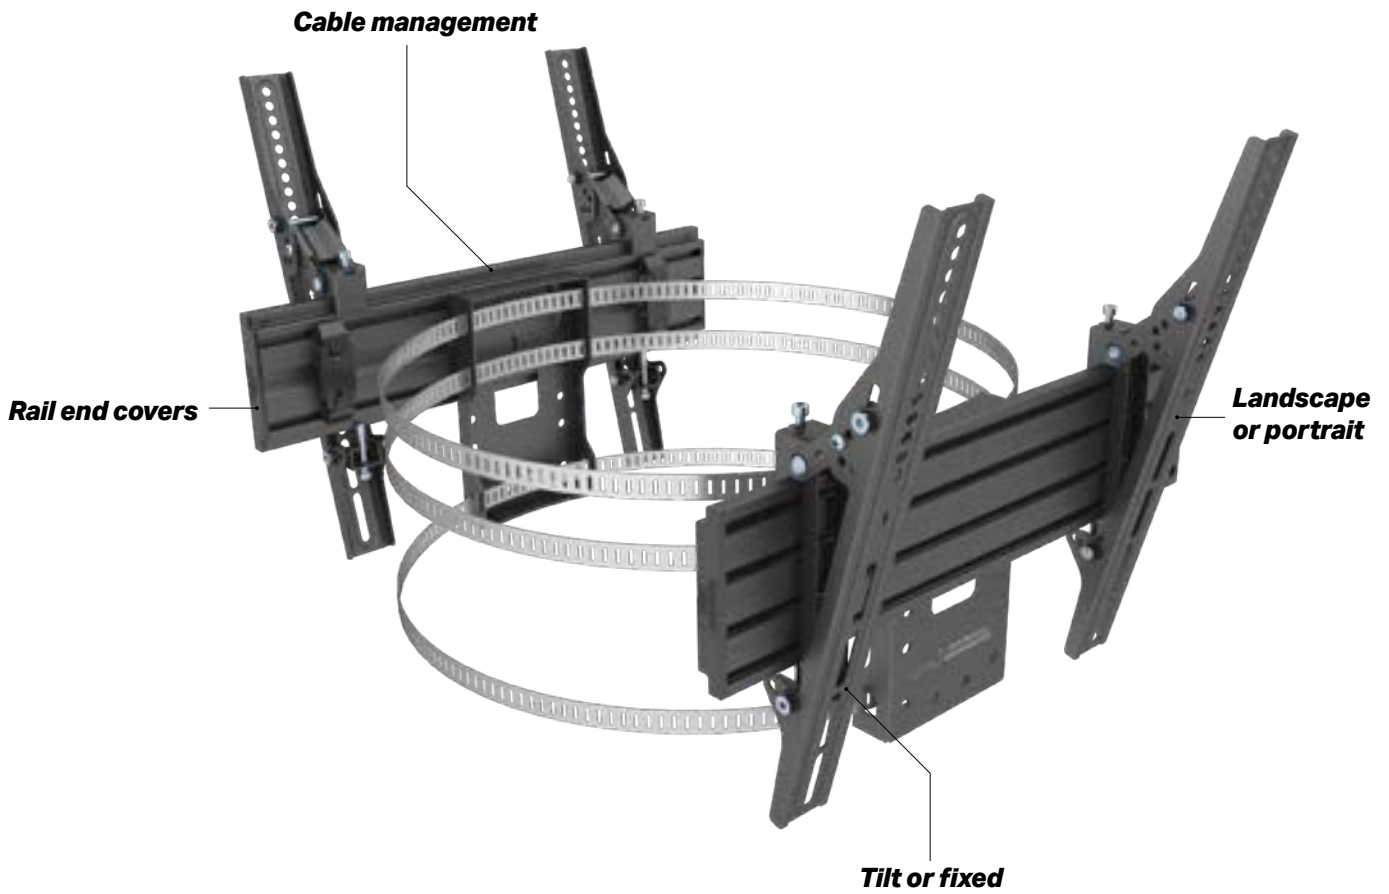

Min. diameter: 23cm
Max. diameter: 73cm

Smart Signage Outdoor Totems

Samsung OHF Series 46"/55"/75"

LG XE4F Series 49"/55"/75"

A powerful all-in-one signage solution for outdoor business communication.

Boost drive-thru sales and improve order efficiency with Multibrackets' universal Outdoor Digital Menu Boards, designed to support Samsung's 46", 55", 75", and 85" outdoor displays. These all-weather-rated units feature low operating costs, a modular design, and straightforward installation. When paired with Samsung OHF Series SMART Signage,

they deliver a complete outdoor engagement solution built for durability, flexibility, and 24/7 performance — even in extreme conditions.

Switching to digital with Multibrackets Outdoor Totems and LG's XE4F Series eliminates the need to manually update static menus. Instead, content can be updated remotely and

in real time, creating a seamless drive-thru experience for customers while increasing restaurant efficiency. With their slim, robust design, LG XE4F displays integrate perfectly into Multibrackets outdoor totems, enabling simple installation and flexible customization to fit your partner's specific needs.

Highlights:

- **Made in Europe**
- **Slim depth**
- **Easy access**
- **Tailormade height possible**
- **Top level materials**
- **Easy installation**

Tripod

Monitor stands

The M Pro Series Tripod Stand is a premium floor-stand solution engineered for professional signage and display applications. With a focus on modularity and ease of deployment, this range offers a robust tripod base, refined Scandinavian aesthetics, and the flexibility to adapt to a variety of environments, from retail spaces

and event venues to corporate foyers and trade-show booths.

Every model in the series is built for quick, reliable installation: the tripod structure delivers stable support, the rail and mount system is fully configurable, and built-in cable management ensures a clean, high-end presentation. From

single-screen setups to complex display configurations, the Pro Series Tripod Stand accommodates evolving display needs while maintaining a unified visual and installation approach.

Pro Series Floorstands Single Pole

The new range of Pro Series single-pole flat panel floorstands is designed to provide the ideal display viewing placement while blending seamlessly with the décor of any environment.

Perfect for public spaces such as retail stores, training rooms, lobbies, classrooms, auditoriums, or exhibition halls, these stands combine

functionality with a clean, modern appearance.

As with all Pro Series products, a full line-up of accessories is available to tailor functionality to your specific needs. Integrated cable management keeps AV cabling concealed, ensuring a tidy and professional look.

Pro Series Floorstands Dual Pole

The Pro Series Dual Pole floorstands are designed to support one or two large displays, mounted back-to-back in either landscape or portrait orientation.

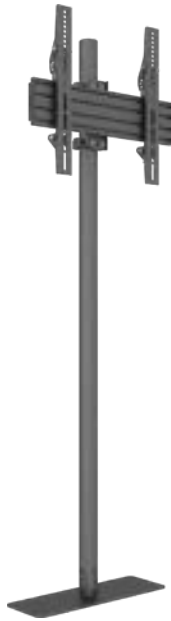

Combining strength with a clean, modern design, these stands are simple to install yet robust and highly functional — making them ideal for a wide range of applications

such as retail stores, training rooms, lobbies, classrooms, auditoriums, and exhibition halls.

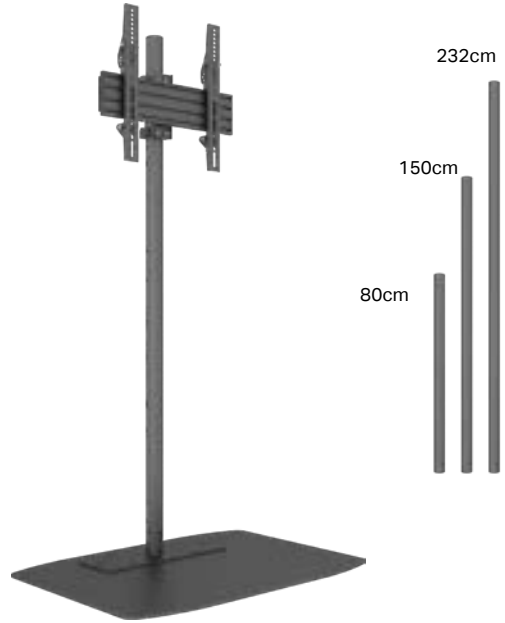

As with all Pro Series solutions, a full line-up of accessories is available to tailor functionality to your specific requirements. Integrated cable management keeps AV wiring hidden, ensuring a neat and professional appearance.

Triple and Quad Floorstands

The Pro Series modular floorstand system is designed to support one, two, three, or more screens, mounted in virtually any configuration, landscape or portrait.

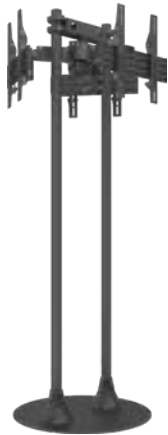

Easy to install and highly adaptable, these floorstands combine a clean, modern design with robust functionality, making them ideal for a wide range of applications such as retail

stores, training rooms, lobbies, classrooms, auditoriums, and exhibition halls.

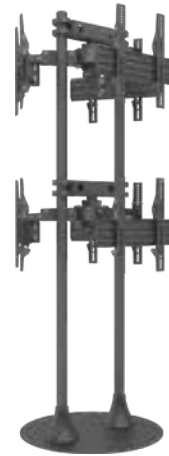

Like all Pro Series products, they are supported by a full line-up of accessories,

allowing you to tailor functionality to your exact requirements. Integrated cable management keeps AV cabling concealed, ensuring a tidy and professional appearance.

Pro Series Floorstand line up

The Pro Series modular floorstand system is designed to support one, two, three, or more screens in virtually any configuration - landscape or portrait. Simple to install yet robust and highly functional, the Dual Pole series combines

clean, modern design with the strength needed for demanding environments. These floorstands provide the ideal viewing placement while blending seamlessly into any décor. Perfect for public areas such as retail

stores, training rooms, lobbies, classrooms, auditoriums, or exhibition halls, the Pro Series delivers both versatility and style. As with all Pro Series solutions, a complete line-up of accessories is available to customize functionality to

your specific needs. Integrated cable management conceals AV cabling, ensuring a neat and professional finish.

Freestanding Video Walls

for any environment

Videowall Stands

Floormounts

Create striking video walls with the Pro Series Video Wall Mounting System. Designed for landscape or portrait use, it supports 32"-65" displays and can expand as your needs change. Sturdy aluminum columns (180, 270,

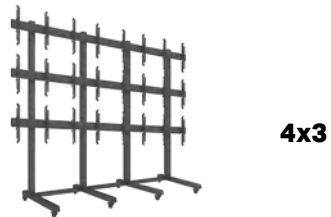

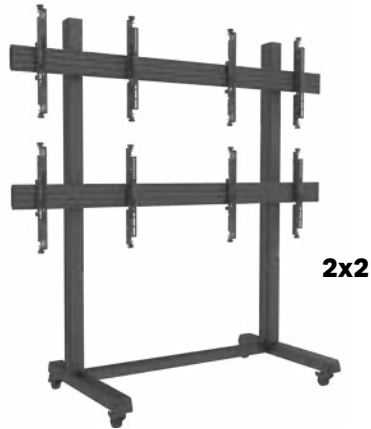

or 300 cm) allow adjustable viewing height for seated or standing audiences. Choose a movable wheelbase or fixed base, ideal for presentations, trade shows, retail, or offices. Built for durability and easy servicing, it's a cost-efficient

solution for digital signage, videoconferencing, and professional use. Displays can be added or removed over time, and the system can be relocated or floor-mounted for permanent setups. Independent height, depth,

and lateral adjustments ensure precise, seamless alignment every time.

Fully configurable

Adapt the setup over time with flexible parts and adjustments

Wheelbased

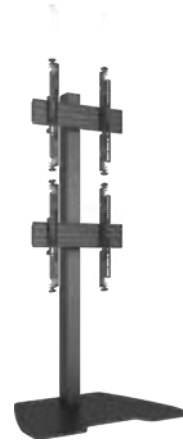

Highlights:

- Floorbase, floormount or wheelbase
- Permanent bolt-down possible
- Integrated cable management
- Change design after new needs occur

Large screen Floorstands

The M Floorstand Column Pro MBFSC1UB 270 Fixed 600X1200 is a high-capacity mobile floorstand engineered for extra-large displays up to 110". Designed for professional environments such as trade shows, corporate lobbies, and control rooms, it combines

smart mobility with robust structure and modular flexibility.

With a durable aluminum build and black textured powder coating, this floorstand provides tool-free height adjustment and supports VESA configurations up to 600x1200

mm. Lockable swivel castors ensure smooth transportation and secure positioning, making it ideal for both fixed and mobile use cases.

Its pre-assembled base streamlines installation, while the modular design allows

for ongoing customizations or upgrades. Delivered with a component shelf and camera holder, this solution is tailored for high-demand AV applications such as video conferencing, digital signage, and interactive displays.

Curved Solutions

Create tailored installations with Pro Series

The M Pro Series Pole line of brackets makes it easy to design customized curved installations, mixing computer monitors with digital signage displays in virtually any configuration. Offering a wide range of flexible solutions with tilt and turn functionality, the system provides both adaptability and precision.

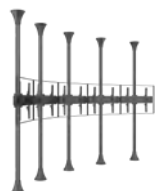

With clean Scandinavian design, durable construction, and straightforward installation, these brackets deliver a professional finish for any environment. Each solution comes complete with all necessary hardware for a fast and reliable setup.

Highlights:

- **Works with most screens the market has to offer**
- **Fast & accurate assembly & installation**
- **Simple access & quick rear service**

Large-scale videowall and simulation setups

The M Pro Series – Video Wall Floorstand MBFC30X2U VESA 400 is a high-capacity digital signage solution designed for permanent, large-scale video wall installations. Supporting up to 20 screens in a 2x10 (two rows, ten screens wide) layout, this freestanding steel structure is ideal for control rooms, retail

displays, conference centers, and other commercial environments where maximum visual impact and modular flexibility are essential.

Each screen is mounted using micro-adjustable VESA arms that allow fine-tuning on the X, Y, and Z axes, ensuring pixel-per-

fect screen alignment. The robust steel frame combined with modular aluminum rails offers long-term stability, quick installation, and the ability to expand or reconfigure the layout as future needs evolve.

Built-in cable management across the entire structure

ensures clean aesthetics and simplified maintenance, while the Scandinavian-inspired design delivers a sleek, professional look suitable for public display. The bolt-down floor base guarantees a secure, vibration-resistant installation for high-traffic areas.

TailorMade

by Multibrackets

Curious how others succeed with their digital signage projects?

Multibrackets plays a key role in successful installations worldwide, working closely with our distribution partners to deliver reliable, tailor-made solutions for every type of project.

From concept to completion, we support you with Scandinavian design, in many cases EU-manufactured quality, and expert guidance, whether you need a standard mount or a fully customized solution.

Contact our Tailor-Made team at:
tailormade@multibrackets.com

Pro Series

Wire combinations

Make a bold design statement with the Pro Series wire-based mounting system. This elegant solution allows you to suspend displays on wires while utilizing standard Pro Series components for maximum

compatibility. Suitable for both single-screen and back-to-back installations, these wire combinations create a striking, minimalistic look that transforms any retail environment. Designed to

combine style with functionality, they offer easy setup and deliver a major visual impact with a clean, modern aesthetic. Up to 600cm height, single or back to back.

A selection of our Enclosures & Totems

Create a sleek, minimalistic look with Multibrackets® enclosures, designed for both portrait and landscape mounting. Among the most versatile on the market, they are available in multiple screen sizes and colors, and support a wide range of professional signage displays.

With smart thermal management, these enclosures ensure reliable performance across

different display brands while maintaining a modern, professional aesthetic. The depth-adjustable exterior frame allows flexibility in display choice, while reversible hinges eliminate installation and service obstructions.

Engineered for serviceability, the design offers unparalleled access for maintenance, integrated passive cooling

with optional active thermal management, and tamperproof security hardware to protect your investment.

These clean-styled black Pro Series enclosures bring new levels of flexibility to the signage enclosure market. Combined with their ingenious design, they can be adapted for multiple mounting options, including wire suspension, floor-

to-ceiling, floorstand, or ceiling mounting, either immediately or as your needs evolve.

M Pro Series Enclosures

Pro Series 10"-24" enclosures

**Simplify small size signage installations
with a thin and easy-to-install enclosure**

Bring elegance and functionality together with Multibrackets' new indoor enclosures, designed to support the latest small-format LED displays.

With their slim profile and ingenious design, these enclosures are easy to install, simple to maintain, and versatile enough for a wide range of applications.

Pro Series LED solutions

Supporting all major brands and mounting solutions

Inspired by AV installers

Multibrackets is committed to meeting the evolving needs of the AV industry. In collaboration with installers and display manufacturers, we have developed a complete line of Pro Series LED mounting solutions, combining innovative features, ease of installation, and simplified maintenance, all at a competitive total cost of ownership.

With decades of audio-visual experience, Multibrackets has become one of the industry's most forward-thinking mount manufacturers. Our Pro Series LED solutions emphasize high-quality design, aesthetic results, and cost efficiency. Behind every solution is a dedicated team of LED professionals, from mechanical engineers to project managers,

working closely with partners and installers to ensure flawless execution and long-term success.

Highlights:

- . Simple installation
- . Cable management
- . Lightweight aluminum
- . Seamless result

Customized Sidecovers:

- . Superslim design
- . Millimeter precision to LED panels
- . Easy afterservice access

Exclusive LED design for:

Multibrackets Sports Arena

Create Next-Level Fan Experiences

Today's fans expect more than just the game — they want immersive, next-level experiences. Modern arenas can deliver this through advanced display solutions that turn venues into dynamic entertainment spaces.

Save Time & Cost - Ready-to-Install Mounting

Multibrackets mounting systems are pre-assembled and prepared for fast, hassle-free installation. For LED projects, every detail is handled in production; for LFDs, the Pro Series ensures universal compatibility and easy re-use across future projects.

Maximize the Arena Experience

With the right mounting, you can boost fan engagement and deliver powerful messages across the entire venue. Our expertise and partnerships guarantee successful LED and LFD installations that enhance the fan experience and open new revenue opportunities.

Multibrackets - combining efficiency, reliability, and impact to transform every sports facility into a next-level arena.

Build Control Rooms

Multiscreen display and monitor mounting for control rooms

Highlights:

- Same mounting rail and system is being used
- Cable management keeps all cables in order
- Wide range of VESA handles all displays
- Easy to change design and outlook after time
- Industrial quality productrange

Pro Series Ceilingmounts

Our ceiling mount solutions are designed to support both monitors and displays, giving you complete flexibility to mix and match as needed.

With Pro Series Ceiling Mount Flexarms, you can create virtually any configuration required for your control room installation — ensuring a tailored, professional, and highly functional setup.

Pro Series Monitorwalls

Multi-screen setups, supporting several 15"-32" displays in a horizontal layout. Its modular design allows precise height and lateral adjustments

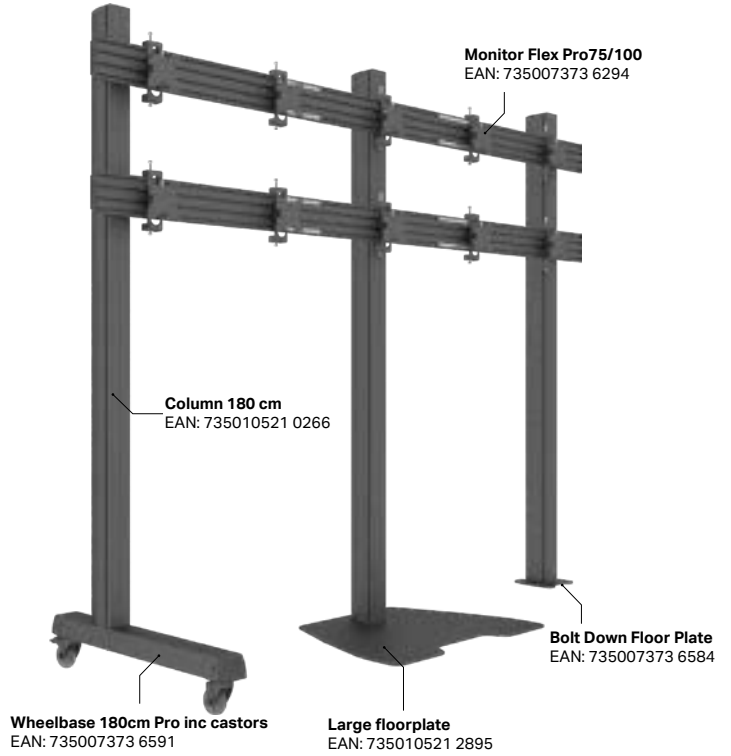

for ergonomic, efficient workspaces, ideal for control rooms, trading desks, and other demanding environments.

**Pro Series
Video/ Monitorwall**

Built on the unique Multibrackets Pro Series rail system, these video walls offer unmatched flexibility. Supporting everything from VESA 50 (common on smaller monitors) to VESA 1000x600

(for large-format displays), the system is designed to handle a wide range of setups.

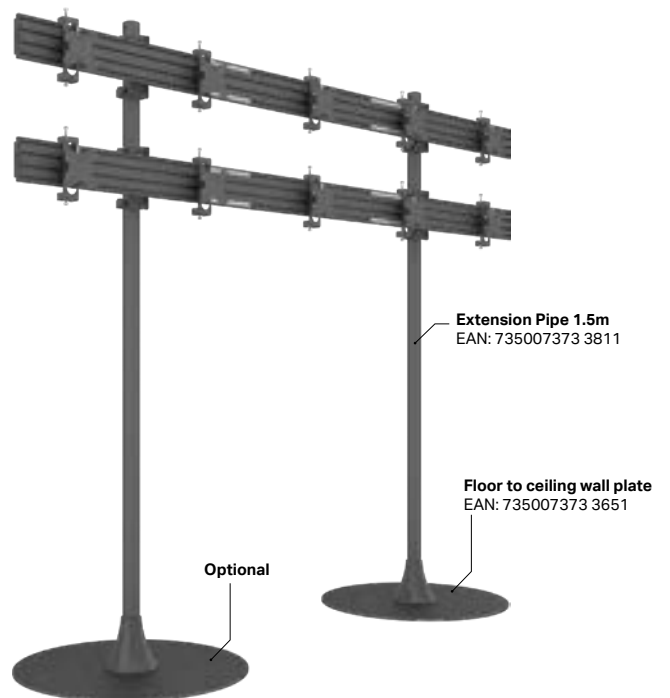

Mix and match large displays with smaller monitors — with Pro Series, your imagination is the only limit.

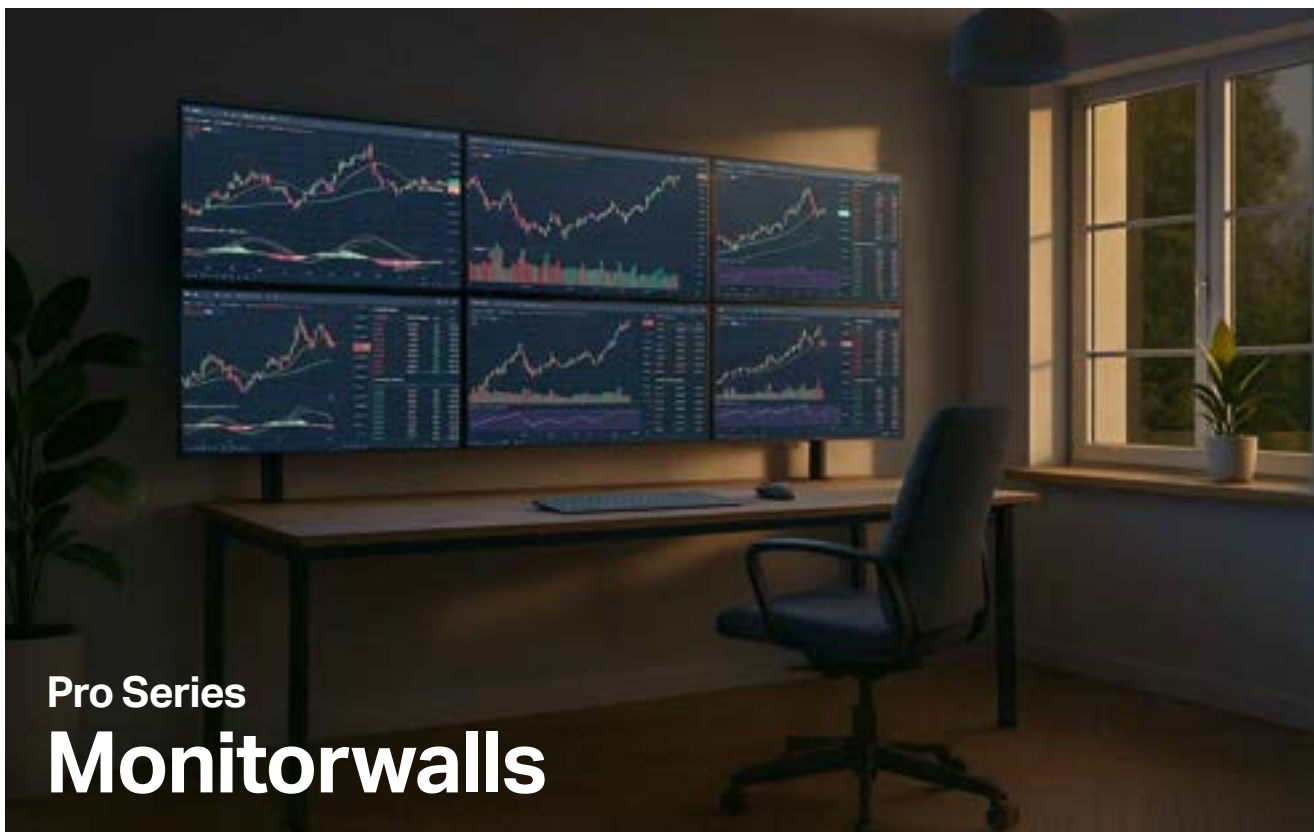

**Pro Series
Monitorstands**

For high-resolution monitor walls, the Pro Series delivers a flexible and reliable solution. Using the Pro Series rail system with fixed or tilt monitor mounts, these stands can accommodate virtually any monitor on the market.

From compact 27" screens to the latest widescreen formats, Pro Series monitor stands are designed to meet your needs with precision and versatility.

Pro Series Monitorwalls

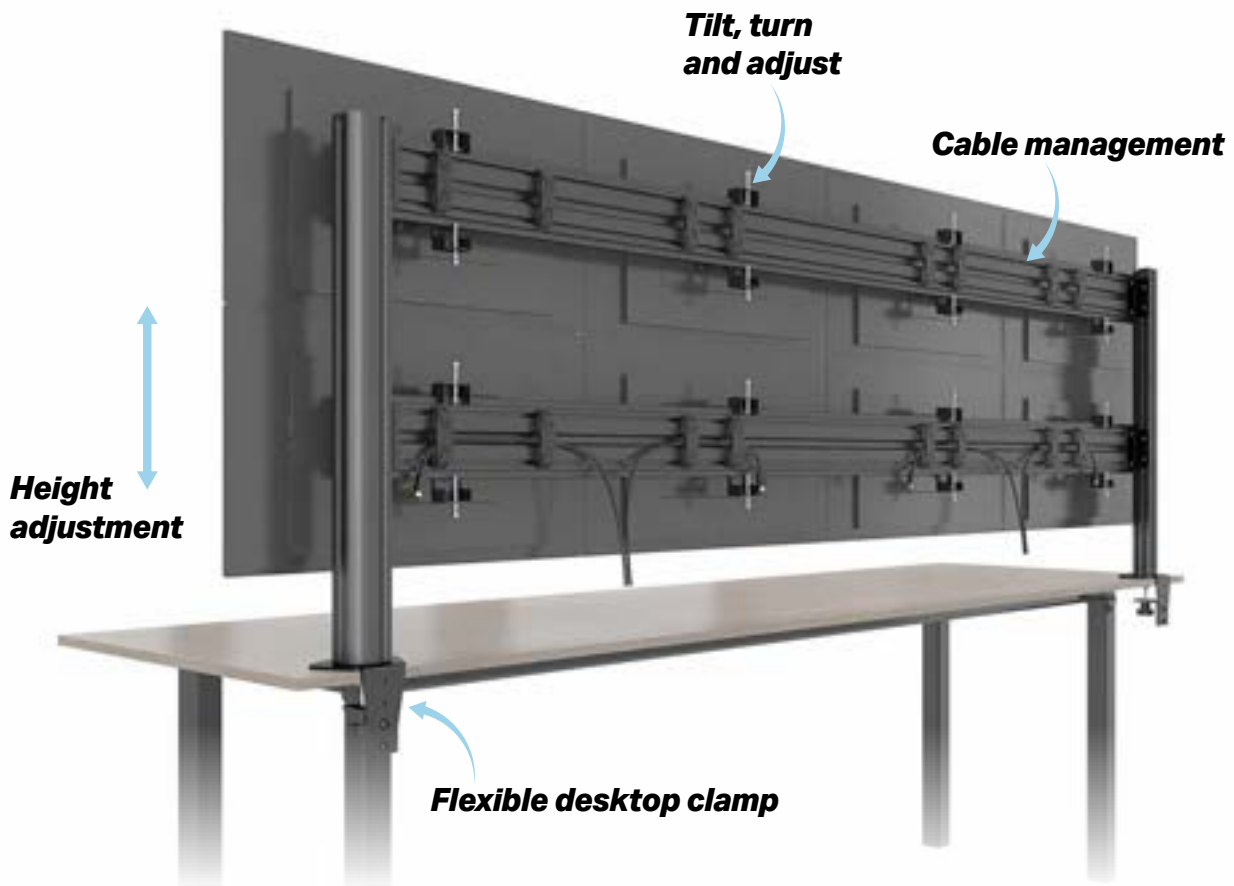

Multibrackets Monitor Wall Systems are designed for professional environments where precision, flexibility, and reliability are essential. Built to support multiple displays in seamless configurations, they provide a clean and scalable

solution for creating high-impact visual installations. Whether used in control rooms, corporate command centers, digital signage networks, or broadcast environments, these systems deliver outstanding structural stability, effortless

alignment, and easy service access. Every detail, from micro-adjustments to integrated cable management, is engineered for performance and a refined Scandinavian aesthetic.

Enclosure Safety Sheets

Function and freedom for the installer

Multibrackets polycarbonate safety sheets are designed specifically for our series of enclosures, providing an extra layer of protection for digital signage displays. Built with safety in mind, they safeguard against tampering, theft, and accidental damage.

Ideal for public environments such as entrances, hospitals, and other high-traffic areas,

these safety sheets combine durability with a sleek, modern appearance.

Engineered to complement the latest digital signage displays housed in Multibrackets enclosures, they offer both security and style — ensuring peace of mind without compromising design.

Cable management

What makes Cable Socks special and why are they needed?

Exposed cables are vulnerable to abrasion, UV damage, and general wear, especially in high-traffic or high-friction environments. Multibrackets Cable Socks protect and extend the lifespan of your cables, helping reduce long-term maintenance costs.

Highlights:

- Expands easily to ensure complete coverage and protection.
- Offers general protection from abrasion, chemicals and temperature for optimal protection.
- Available in various sizes and colors.
- Designed to adjust and expand to irregular shapes.
- Keeps its flexibility under a wide range of temperatures and over time.
- Constructed from tightly woven polyester material.
- Provides easy installation on already existing applications simply unwrap the cable sock and apply directly to your cable or product.
- Highly versatile with flexible properties, excellent for office/commercial/ industrial uses.

Unlike traditional braided sleeving or wire loom, our Cable Socks install quickly without special tools or tedious sliding. The available colour options also make it easy to colour-code and identify your cable infrastructure.

Ideal for AV and computer cables, server halls, data centres (including optical cables with our 5 mm version), hospitals, hotel rooms, and any setting that requires durable, high-quality cable protection. All Multibrackets Cable Socks are also fire-retardant.

M Universal Cable Socks Self Wrapping

Material:	Polyester
Self wrapping:	Yes
Sock length:	25 m
Working temp. :	-50°C-+ 150°C
Melting point:	240±10°C
Flammability:	8s6853 lb UL94 V-0 FMVSS 302
Monofilament diameter:	0.25mm
Safety:	Fire retardant material
Certificate:	RoHS
Warranty:	5 years
Weight:	Depending on size

Wear-resisting level:
ISO6722, Load 7N, Number of scratches ≥3000 times, high wear resistance.

Application:
It is widely used in electrical wiring, cables, wiring harness and hoses for high-speed trains, cars, automation equipment, instruments, and especially for irregularly wiring harness.

Multibrackets

Everything starts with you.

Great products are born by putting the user at the heart of everything we do.

Mission

At Multibrackets, our mission is to create products that are simple to install and easy to use - solutions that excite and meet our clients' everyday needs, all year round. Based in Stockholm, Sweden, we design, develop, and market AV equipment in our own way: with genuine passion for technology and user-centric innovation. Every product is infused with a touch of Multibrackets magic.

About us

Founded in 2000, we are a family-owned company represented in more than 30 countries. Today, Multibrackets is recognized as one of the leaders in the rapidly evolving field of digital signage technology. Together with our distributor network, we deliver hardware and services that transform ideas into ready-to-use solutions.

With one of the most comprehensive product lines in Europe, we supply AV equipment for virtually every need - and our reputation for innovation is well established across the industry.

Become a partner

Stay ahead of the competition - become a Multibrackets partner. Simply email us at support@multibrackets.com or visit products.multibrackets.com/en/contact to connect with our team. We'll help you establish contact with a distributor and get started. We look forward to hearing from you.

Sustainability

At Multibrackets, we see sustainability as an ongoing journey. Being part of the AV industry means carrying responsibility for the environment and for everyone involved in making our products.

We are committed to designing sustainable solutions, reducing our environmental impact, improving sourcing practices, and creating a great workplace for our employees. Find out more about our initiatives and achievements on our website.
