BOLIN TECHNOLOGY

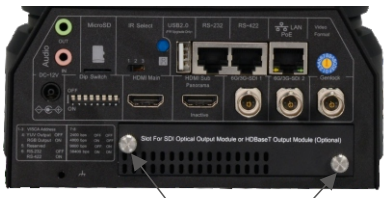
SDI Fiber-Optical Video Output Extension Card Installation Guide

1. SDI fiber-optical video output expansion card and optical module installation steps

Note:

Must be operated in the power-off status when installing the SDI fiber-optical video output expansion card and optical module

①



Loose the screw (no need to unscrew it off) and pull it out in parallel

②

Insert the SDI fiber-optical video output extension card into the slot in parallel

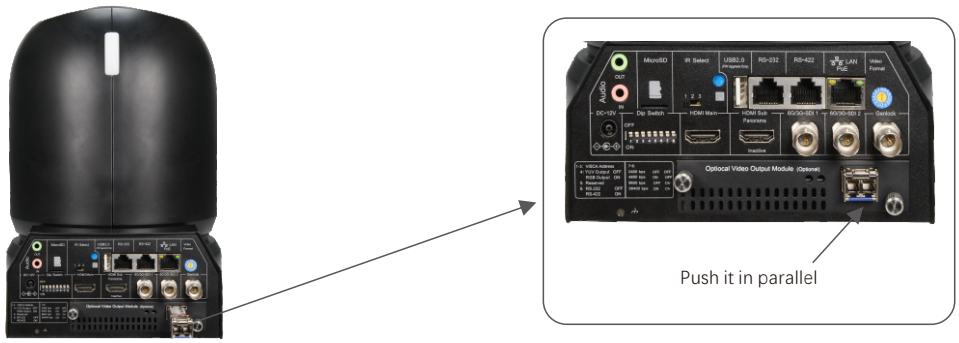
③

Push it in parallel, then tighten the screws

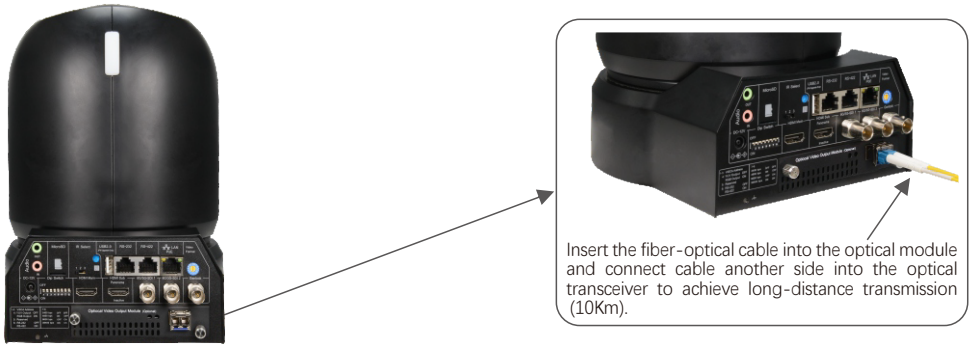
④

Insert the optical module into the SDI fiber-optical video output expansion card.
Optical module: single-mode 1,310nm,
Connector: duplex LC

⑤



⑥



2. SDI fiber-optical video output extension card suitable for model

- BC-9-4K12S-S6MN/B BC-9-4K12S-S6MN/W BC-9-4K12S-S3MN/B BC-9-4K12S-S6MN/W

3. Optical module recommended model

- BC-9-VC-SFPM
